Re: Stanford Docket S85-043, "A New Approach to Digital  
Reverberation"

Dear David:

I have enclosed information on the above referenced invention developed  
by Julius Smith at CCRMA.

We would like to file a patent application on this technology. Julius will  
be presenting a paper on the technology; we would like to have the applica-  
tion on file before then.

I would like to set up a meeting at CCRMA on a Wednesday afternoon at 1 p.m.,  
if possible. Julius will have additional material available at the meeting.

In addition, I would also like you to meet with Bernard Mont-Reynaud, one of  
the developers of the Musical Analysis and Automatic Transcription Program  
to determine whether the system or any parts of it are patentable.

Please call me to set up a meeting time.

Sincerely,

*Lisa Kuuttila*
