1 Introduction

In a special issue of the Journal of the American Musicological Society in 2019, Matthew D. Morrison summarized the state of race in musicology:

“Although musicology did not develop in the United States until the early to mid-twentieth century, it is built upon the discipline inherited from Europe (focused primarily on white male composers), it was established within a racist societal milieu of Jim Crow segregation, and “popular” styles of music often associated with racialized groups or people of lower socioeconomic classes were slow to gain a place within it. As a result, aside from studies of the “folk” music of black and other minoritized Americans taken up primarily by ethnomusicologists, dominant musical discourse before the 1970s and 1980s largely ignored the music of such groups and classes—especially black popular music. In an article of 1996, Guthrie Ramsey astutely observes that “[d]espite [the] historical interest in black music, its journey to academic legitimization has mirrored the progression of black Americans themselves into mainstream American life: slow, demanding, and sinuous.” Significantly, since the publication of Ramsey’s article, the nation has elected its first African American president, Barack Obama, and musicology has made efforts to expand its membership and disciplinary boundaries so as to be more diverse. Yet the current political moment—in which the lives and basic rights of black and brown Americans and many other marginalized groups are under constant threat—cautions us against assuming
we have already made significant advancement toward racial justice, equity, or inclusion within the discourse and its membership, or within professional music societies. According to the 2017 National Science Foundation report, the number of scholars of color granted PhDs in music studies remains exceptionally low. Of 157 PhDs awarded in Musicology and Ethnomusicology combined, 8 were Hispanic/Latinx, 1 was American Indian or Alaska Native, 6 were Asian, and 3 were African American; of 86 awarded in Music Theory, 2 were Hispanic/Latinx, none were American Indian or Alaska Native, 4 were Asian, and 3 were African American. As I wrote in 2012, until there is a drastic increase in the number of scholars of color who attain graduate degrees in music studies or are a part of the American Musicological Society, the Society for American Music, the Society for Ethnomusicology, and other music societies, we might continue to find these scholarly voices and their intellectual concerns and topics marginalized or silenced rather than located within the core of music studies.”

2 Plots

2.1 Musicology and Ethnomusicology

Plots of combined data for PhDs granted in musicology and ethnomusicology from 2009-2018.
Below is the same data, but organized by year.

Here is the same data organized by ethnorace.
2.2 Music Theory and Composition

Plots of combined data for PhDs granted in music theory and composition from 2009-2018.
Below is the same data, but organized by year.
Here is the same data organized by ethnorace.
2.3 Music Performance

Plots of data for PhDs granted in music performance from 2009-2018.
Below is the same data, but organized by year.
Here is the same data organized by ethnorace.
3 Data

The data is displayed below. You can also navigate from the following link to locate the original data sources (see Table 22): https://ncses.nsf.gov/pubs/nsf20301/data-tables/.

4 Code

For those interested in working with the data, I have included my code below.

4.1 Libraries

library(dplyr)
library(ggplot2)
library(tidyrd)

4.2 Import

# setwd("/Users/tysendauer/Desktop/music_phd")
data <- read.csv(file = "music_phds_ethnorace.csv")

4.3 Wrangle

data_clean <- data

# Rename columns
names(data_clean)[1] <- "major"
names(data_clean)[5] <- "Latinx"
names(data_clean)[6] <- "American Indian"
names(data_clean)[8] <- "Black"
names(data_clean)[10] <- "More than one"
names(data_clean)[11] <- "Other or not reported"

# Add year column

# Remove year from major column
data_clean$major <- substr(data_clean$major, 6, 1000)

# Select columns to continue with
data_clean <- data_clean %>% select(-2:4, -12)
4.4 Gathering

data_gathered <- data_clean

data_gathered <- data_gathered %>%
gather(key = "ethnorace",
       value = "count",
       2:8)
data_gathered <- data_gathered %>%
mutate(ethnorace = factor(ethnorace,
                         levels = c("Latinx",
                                     "American Indian",
                                     "Asian",
                                     "Black",
                                     "White",
                                     "More than one",
                                     "Other or not reported")))

4.5 Divide by degree type

musicology_and_ethnomusicology <- subset(data_gathered,
                                          major == "Musicology & ethnomusicology",
                                          select = 2:4)
music_performance <- subset(data_gathered,
                              major == "Music performance",
                              select = 2:4)
music_theory_and_composition <- subset(data_gathered,
                                        major == "Music theory and composition",
                                        select = 2:4)

4.6 Plots

4.6.1 All data

plot_all_function <- function(data)
{
  ggplot(data = data,
         aes(x = year,
             y = count,
             fill = ethnorace)) +
  geom_bar(stat = "identity",
           position = position_dodge()) +
  geom_text(aes(label = count),
            vjust = -.25,
            color = "black",
            position = position_dodge(0.9), size = 2) +
  scale_x_continuous(breaks = c(2009:2018)) +
  scale_fill_discrete(name = "Ethnoraces",
                      values = c("Latinx", "American Indian", 
                                  "Asian", "Black", "White", "More than one", 
                                  "Other or not reported")))
```
labels = c("Latinx",
          "American Indian",
          "Asian",
          "Black",
          "White",
          "More than one",
          "Other or not reported")

theme_classic()
}

4.6.2 By year

plot_year_function <- function(data)
{
  musicology <- ggplot(data = data,
    aes(x = ethnorace,
        y = count,
        fill = ethnorace)) +
    geom_bar(stat = "identity",
             position = position_dodge()) +
    geom_text(aes(label = count),
              vjust = -.25,
              color = "black",
              position = position_dodge(0.9), size = 2) +
    scale_fill_discrete(name = "Ethnoraces",
                        labels = c("Latinx",
                                    "American Indian",
                                    "Asian",
                                    "Black",
                                    "White",
                                    "More than one",
                                    "Other or not reported")) +
    facet_wrap(~year) +
    theme(axis.text.x = element_blank(),
          panel.background = element_blank())
}

4.6.3 By ethnorace

plot_ethnorace_function <- function(data)
{
  ggplot(data = data,
         aes(x = year,
             y = count)) +
  geom_bar(stat = "identity",
            position = position_dodge()) +
  geom_text(aes(label = count),
            vjust = -.25,
            color = "black",
            position = position_dodge(0.9), size = 2) +
  facet_wrap(~ethnorace) +
```

4.7 Plotting for each data set

4.7.1 Saving as pdfs

```r
save_function <- function(name)
{
  ggsave(filename = name,
          device = "pdf",
          width = 10,
          height = 7)
}
```

4.7.2 Plots

```r
ology_all <- plot_all_function(musicology_and_ethnomusicology) +
  ggtitle("Musicology and Ethnomusicology by year and ethnorace")
save_function("ology_all.pdf")
ology_year <- plot_year_function(musicology_and_ethnomusicology) +
  ggtitle("Musicology and Ethnomusicology by year")
save_function("ology_year.pdf")
ology_race <- plot_ethnorace_function(musicology_and_ethnomusicology) +
  ggtitle("Musicology and Ethnomusicology by ethnorace")
save_function("ology_race.pdf")

perf_all <- plot_all_function(music_performance) +
  ggtitle("Music performance by year and ethnorace")
save_function("perf_all.pdf")
perf_year <- plot_year_function(music_performance) +
  ggtitle("Music performance by year")
save_function("perf_year.pdf")
perf_race <- plot_ethnorace_function(music_performance) +
  ggtitle("Music performance by ethnorace")
save_function("perf_race.pdf")

th_all <- plot_all_function(music_theory_and_composition) +
  ggtitle("Music theory and composition by year and ethnorace")
save_function("th_all.pdf")
th_year <- plot_year_function(music_theory_and_composition) +
  ggtitle("Music theory and composition by year")
save_function("th_year.pdf")
th_race <- plot_ethnorace_function(music_theory_and_composition) +
  ggtitle("Music theory and composition by ethnorace")
save_function("th_race.pdf")
```
