

Progress Report on the Development
of the FM-type Musical Instruments
for the period of
March 1980 through February 1981

March 1, 1981
NIPPON GAKKI CO., LTD.

We are pleased to report you that the following three projects are now coming on the commercial production stage as the results of research and development efforts of these several years.

1. TRX Project

The first FM-type model group of GS-1 and GS-2 (formerly called as TRX) have been on production stage since December '80. The brochures of these models have been already given to you by Mr. Hiyoshi last time. These models had been shown and got the big sensation on both Western NAMM (Los Angeles) and Messe (Frankfurt) at the same time, early February this year.

2. CHX Project

After the final necessary tests, the production of the highest quality classic organ CH-3 (formerly called as CHX-3) would start on this March.

3. #1600 Project

Getting the Prof. Chowning's assistance of last July, the most important part of the #1600 development, tone parameter settings, had been already finished and we are expected start of the production from coming August at latest.
