Re: Grant for the Support of Visit to CCRMA by John Pierce

Dear Charles:

John Pierce is making an extended visit to CCRMA for the purposes of:

Getting acquainted with the ongoing research at CCRMA

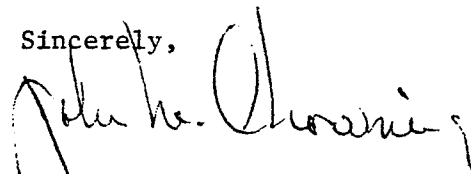

Getting "hands on" experience with the CCRMA  
computer system

To study and replicate synthetically the Wessel  
illusion of sound perception and Terhardt's  
theory of pitch

And to interact with researchers at CCRMA  
particularly Julius Smith, David Jaffe and Chris Chafe  
regarding synthesis techniques and the "Carver Meade Chip."

As per our discussion, we request a grant of \$4,200 to cover the cost  
of housing rental and miscellaneous expenses for the period February 15  
to June 15, 1983.

Sincerely,

John M. Chowning
