Date: September 21, 1991 (1 page)

Dear professor Chowning,

We would like to express our special thanks to you for your hospitality to our visit at CCRMA on September 13.

Demonstrations you provide us were very interesting, most impressive was happy experience of conducting by the Radio drum presented by professor Mathews which I am introducing to our six concerned functions with the documents provided and my recommendation, and elaborated work of vocal utterance simulation by Mr. Cook.

We also loved nice lunch very much and happy meeting there with you involving professor Pierce and professor Mathews, with whose conversation I felt scientist's passion and was much inspired.
Please convey our best regards to them.

In the mean time, I have reported to director Sata all that we looked at CCRMA and your courteous reception for us.

Thanks again for your warmest support to us.
Hoping to see you again in US or Japan,

Sincerely,

Masaharu Kuwabara

Chief Engineer

R&D Planning Division
