Dear Mr. Kamiya:

Sorry for this late response to your telex. I am on sabbatical at M.I.T. and will return to Stanford in June.

We do not of course object to payments one month earlier than before but feel the maximum royalty should continue at 450,000 dollars for each period, including the shortened November 85 to March 86 period.

However, on the good news side, we are willing to discuss an extension of the period of exclusivity for patent rights in Japan, when we meet to discuss subsystem and LSI royalties. It would be preferable to have that meeting in Japan this Fall, if that is OK with you.

Best Regards,

Niels Reimers
