Subject: OTL patent income distribution for 93-94 to H&S

Dear Joe,

I write regarding the distribution of patent income from account 129P048-1ZEA129, docket S71-017. This is the patent income from Prof. John Chowning's "FM Sounds", also known as the Yamaha patent.

The distribution to the department and to the School is usually transferred into account 129R003-1EAA108 in August. Last year, the distribution was held up until October, making it difficult to close the fiscal year books for the Computer Music Center (CCRMA) which the patent income supports. To avoid a similar difficulty this year, Would you please let me know the estimated date of distribution and the amounts?

There is a second patent, account 129P082-1ZEB146, known as "Waveguide." Would you please let me know if there is any anticipated distribution for this patent in 93-94 or 94-95?

Thanks,

Nancy Padgett
Director of Finance
School of Humanities and Sciences
