

We've had success over the Summer (2018) with OSX 10.11 - 10.13 using this incantation: (jack and jacktrip)

jack OSX:

<https://github.com/jackaudio/>

jacktrip:

<https://ccrma.stanford.edu/>

- 1) Install the above
- 2) start jackpilot with desired soundcard, srates, buffer size
- 3) start qjackctl with core audio
- 4) start jacktrip (server or client)

The extant jack for OSX project is

<https://github.com/>

and linked from here <http://jackaudio.org/>
