

Tired of biking to class in the rain? Make every day bright with:

DROP-TOP BIKE UMBRELLA

Get to class dry and on time! Roll through the school with the Drop-Top Bike Umbrella, shaped like a raindrop to increase aerodynamics. Available in a wide range of colors, the waterproof material will prevent 99.9% of all water splashes.

We cannot control the weather, but we can control how we adapt to it.

While in the shape of a raindrop yourself, you will tear through the campus and attract the awe of all of your peers. A one-size-fits-all shape allows you to ride comfortably and stay dry.

Features:

- Waterproof
- Covers entire body and backpack
- Transparent front and side view
- Prevents backplash without the need for a splash guard
 - Built-in bike lights for visibility
- Durability when biking at high speeds
 - Leg flaps

USER MANUAL

1

Attach the mounting structure to the bike by attaching a clamp in the middle of each bike handrail stem.

2

Place the stem of the umbrella between the clamps (with the transparent portion on the side with the front wheel) and tighten the clamps with the screw on the side.

3

Position the wire frame so that the center transparent piece is at the front of the bike, with the two side transparent windows on the sides.

4

Drape the dotted lines that indicate the location of the bike seat over the wet seat.

5

Position the dotted lines that indicate the location of the handbar grips over the handbars.

6

Press the back of the bike lights on both the front lights and back lights to turn them on. You are now ready to bike! Make sure to follow all bike laws and have a safe trip.

7

When you get to your desired location, loosen the clamps on the side of the umbrella base and remove it from the mounting structure.
