

cube³

a clean you and a clean Earth

What is cube³? cube³ is a skincare company focused on providing you with the best skincare while saving the environment. Our cubes are suited for a variety of skincare needs, whether it be shampoo, conditioner, moisturizer, or facial cleanser. You can buy a yearly, biannual, or monthly supply of any of our skincare cubes.

How does cube³ save the environment while tailoring to your needs?

1. Our packages are completely compostable and waterproof: you can place packages in the shower to keep unused cubes sheltered from water.
2. We use sugarcane fiber as the packaging material, and lignin to waterproof the sugarcane fiber...
no plastics = safer to use!
3. The ink that we use on our packaging originates from the henna plant.
4. The dyes that we use in our cubes are all natural.

You need cube³ because:

1. Our products last longer than liquid products because they are in solid form.
2. The cube³ is easy to take through airport security! No need to check if they are less than a certain amount of fluid ounces.
3. We do not use plastics in our products! Only the best and most natural materials should go on your skin.
4. You can save the environment while using the best skincare products for you!

The cubes: here we have shampoo (S1), body wash (S3), and body moisturizer (S4).

cube³

A Guide

How does cubed³ work?

1. All you need is water!
2. Take one cube, wet your hands, and rub your hands for 10 seconds
3. Wash!

cube³ comes in different varieties:

shampoo, conditioner, body wash, face wash, facial moisturizers, body moisturizers, handsoap, and sunscreen. Each cube has a different color and an encarved letter to help you identify what it is used for. Please refer to the key to the right of this text.

shampoo: pink, S1
conditioner: orange, S2
body wash: yellow, S3
body moisturizer: green, S4
facewash: blue, F1
face moisturizer: purple, F2
handsoap: brown, W1
sunscreen: white, P

A little more information on our
compostable packaging:

1. Both the outside and inside of the packaging are waterproof.
 2. The cubes are sealed with a cover and base layer of packaging that clicks together to ensure secure sealing.
 3. Make sure to put the cover on the base after you have finished using the cubes, especially when using in the shower
 4. On the inner walls of the packaging is an on-the-go package to meet travel needs.
- The on-the-go package fits 200 cubes and is also waterproof and compostable!

Anyone can use this product, even if he or she is vision-impaired. We wanted to make sustainability accessible to all! Let us know what we can do better by emailing cubecubed@.....com.

Thanks for buying our product - you are helping to make the earth cleaner one cube at a time!
