find friends without the burden of small talk

Hello! What have you been up to today?

- Watched an episode of “The Office”
- Trained for an upcoming triathlon
- Purchased a pair of Converse

Meet new people!

T.V. show: Friends

Total members: 1098
Active members: 23

Cody Fisher
Omg how many have you watched episode 5 of season 2?
Jan 18, 2021 14:32

Robert Fox
I just watched that yesterday! Ross and Rachel were definitely not on a break.
Jan 18, 2021 14:58

Jones Hawkins
Hm, I’m on the fence. But, either way, did you see that the show is getting a reboot this year?
Jan 18, 2021 14:58

Cameron Williamson
I saw. Apparently, no new members will be added to the cast.

What are your thoughts?
What is 24?
24 is an app that connects you to people who are having a similar day as you.

What's the catch?
The group chats you are placed into will disappear within 24 hours. Because communities are reset on a daily basis, members are more quickly forced into deeper conversations.

How it works:
Upload a few words to describe an activity you have participated in. The activities can be as specific as "went to Costco," or as broad as "worked out."

Based on your activities, our advanced AI (which tracks keywords) will place you into a group chat with people who have done similar activities.
Tokens:
Most memories are captured through photos and videos. However, oftentimes, screenshots of funny/witty/inspirational/thought-provoking conversations are what spark memories. In the app, you are able to pin photos, videos, comments, and articles. The app will automatically categorize these "tokens" based off the category of activity.

Monthly Collage:
At the end of the month, you will be sent a categorized collage of all your tokens.

Premium version:
With the premium version, you are able to friend/follow people. This allows you to communicate with them off the app. When you follow people, you will be updated on their daily activities.

Location-based communities:
We understand that sometimes larger group chats can get overwhelming. In Settings, there is an option for you to limit your interaction to members who are within a certain radius.
