

# Forget-Me-Not Board

- ❖ Take out the trash
- ❖ Submit Biology Final Project
- ❖ Pick up apples at grocery store
- ❖ Call Dad back
- ❖ Write Thank You Note for Grandma
- ❖ Pay back Henry for lunch
- ❖ Pick up laundry from dry cleaners
- ❖ Deposit cash at the bank

**Forget-Me-Not Board is the future of task management and memory aid. The board uses next-generation cloud technology to manage tasks seamlessly between the traditional marker-based whiteboard and keyboard-based smartphone. Intended to hang in one's bedroom or office, the board gives users a clear agenda of their unfinished tasks without a need to scroll through apps or sift through papers. Users can edit their to-do list by typing into a text box, drawing, or erasing on the Forget-Me-Not app, or they can make edits with dry-erase markers and erasers on the board itself. Every time a change is made, it is automatically saved to the cloud to guard against keyboard slips or accidental erasures.**

# Features

**Forget-Me-Not Board (24x40 in)** has the interface and feel of a traditional whiteboard yet features an interactive screen underneath that tracks the movements of the markers and to upload changes to the cloud and reflect those changes in the app.

The board includes 4 dry-erase markers, 1 eraser, and 1 bottle of board cleaner and is compatible with any brand of markers/erasers/cleaner to afford the user flexibility when shopping for replacements, in turn minimizing upkeep costs.

The Forget-Me-Not App is free to download on IOS, Android, and other app stores and takes less than 5 minutes to pair to a new board. Must be in range to pair initially, but updates from the app are automatically uploaded through the cloud to the board from anywhere.

# *New Way of Life*

*No More  
Forgetfulness*

*Productivity*

*Peace of Mind*
