# Eco-integration

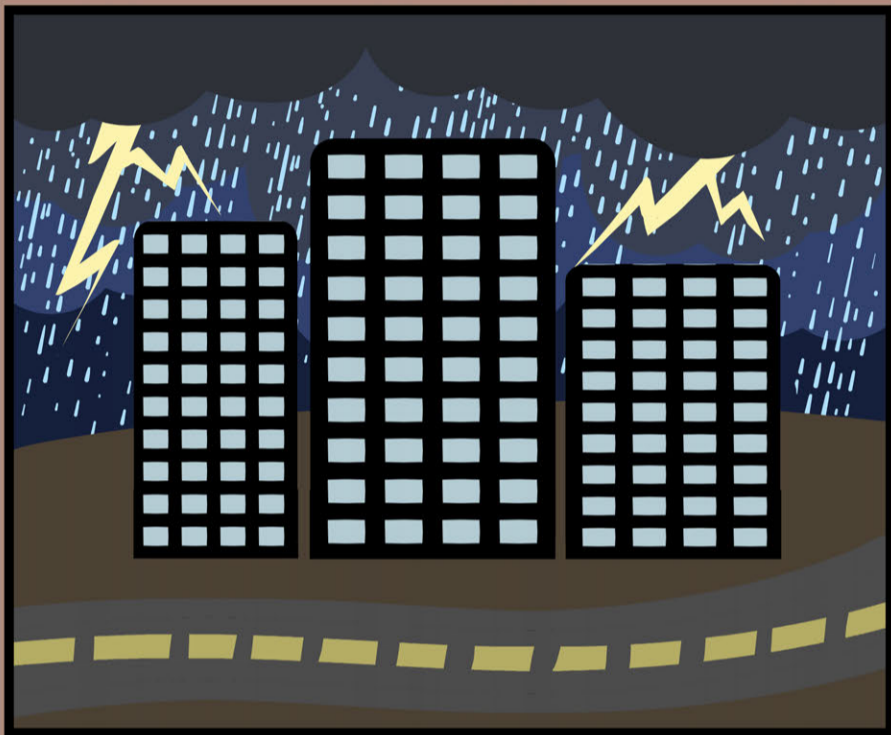

FEBRUARY 2034

A team of researchers at Stanford University hits upon a possible solution to the conditions in large cities: eco-integration. This information is soon disseminated to surviving settlements around the world, and gives humanity a fighting chance of survival in the face of unprecedented global adversity.

# Eco-integration

## EFFECTS

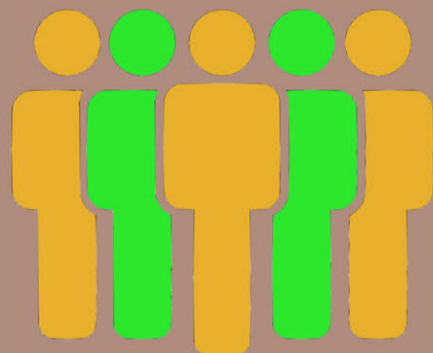

## BENEFITS

### SAFETY

Eco-integration helps to mitigate the impacts of the freak weather that affects urban areas, making life safer for urban residents.

### COMMUNITY

Eco-integration is a community effort; thus, it helps to maintain social relationships and brings communities together.

### HEALTH

Eco-integration, once implemented, surrounds people with nature, which has proven positive impacts on mental health and helps combat biophobia.
