INTRODUCTION

Juan-Pablo Cáceres

Network Musical Performance Workshop

Technical and Artistic Strategies to Perform Around the Globe

Center for Computer Research in Music and Acoustics (CCRMA)
Stanford University

Workshop Overview

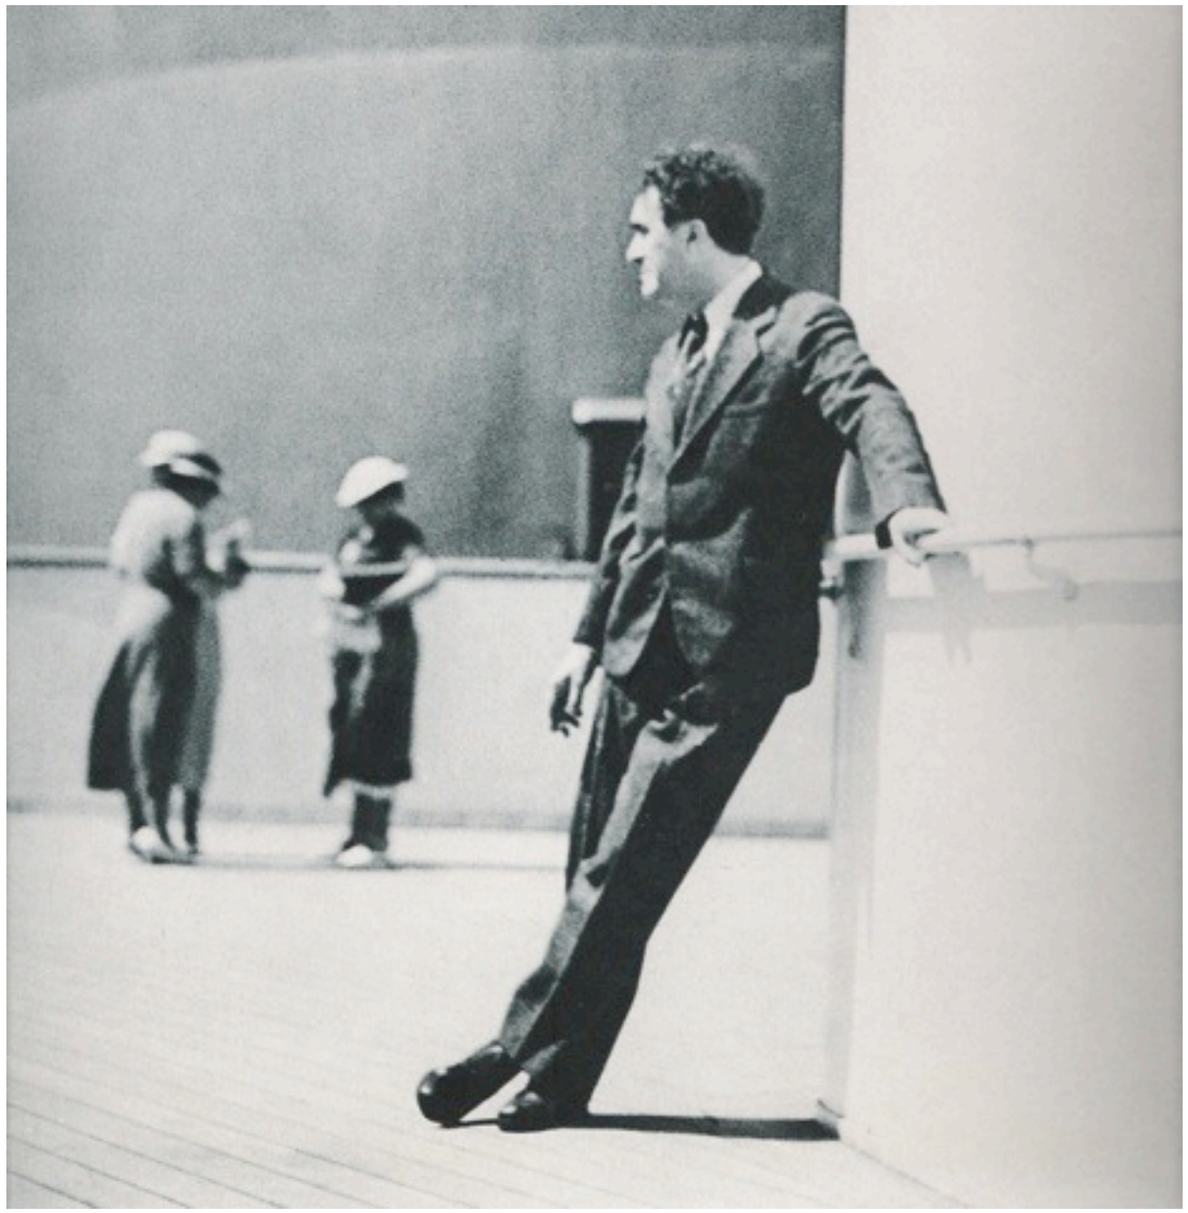
https://ccrma.stanford.edu/workshops/nmp2010/

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

The Vision

"I dream of instruments obedient to my thought and which with their contribution of a whole new world of unsuspected sounds, will lend themselves to the exigencies of my inner rhythm."

Edgard Varèse (1917)



Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Before the Computer

Ada Lovelace during her work with Babbage's difference engine:

"Supposing, for instance, that the fundamental relations of pitched sounds in the science of harmony and of musical composition were susceptible of such expression and adaptations, the engine might compose elaborate and scientific pieces of music of any degree of complexity or extent."

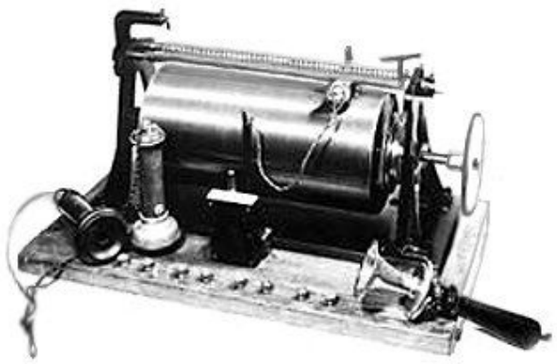
Ada Lovelace (1843)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Beginnings of Electronic Music

Elisha Gray: “Musical Telegraph” (1876)

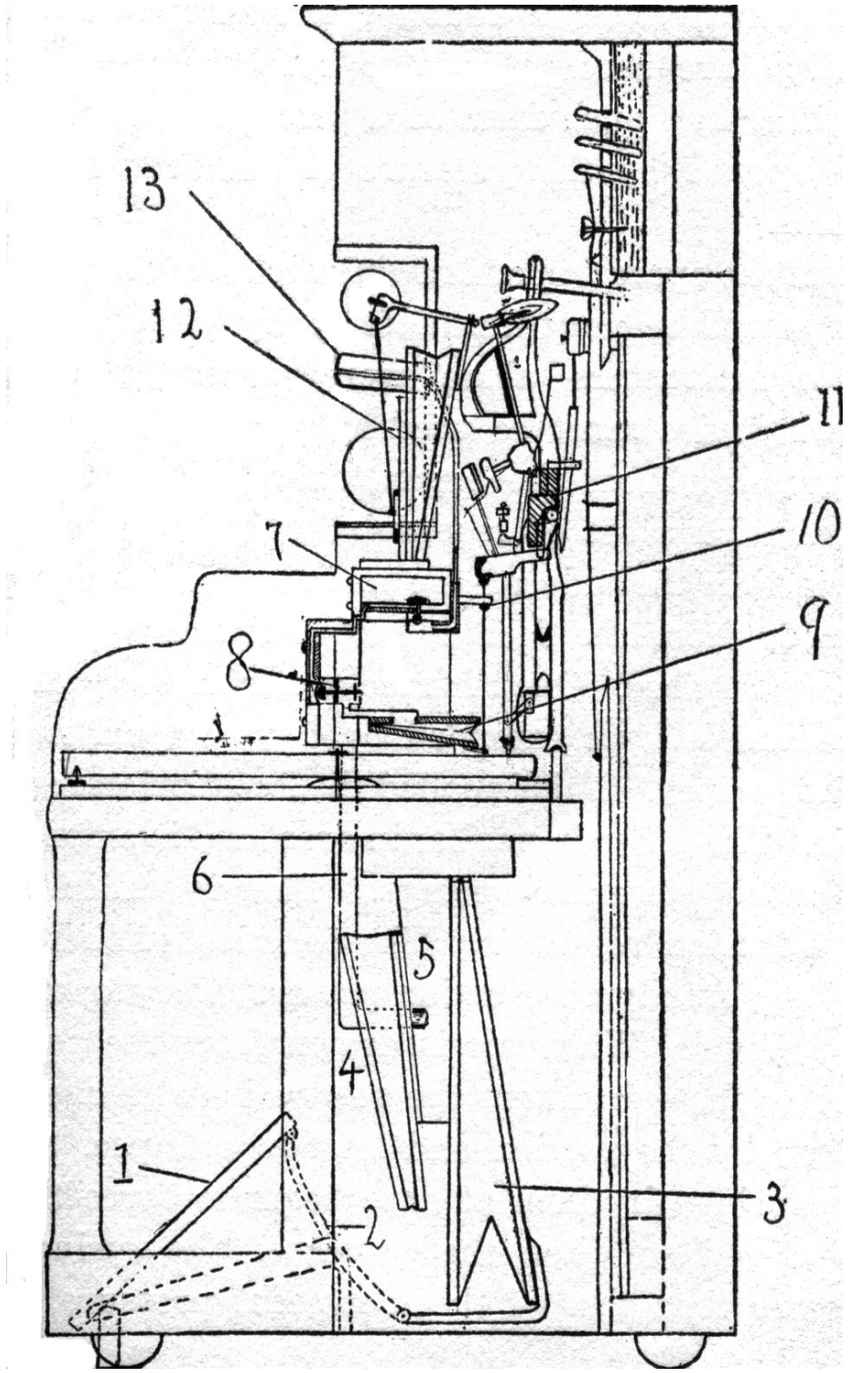
Thomas Edison: “Phonogram” (1877)



Valdemar Poulsen: “Telegraphone” (1898)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

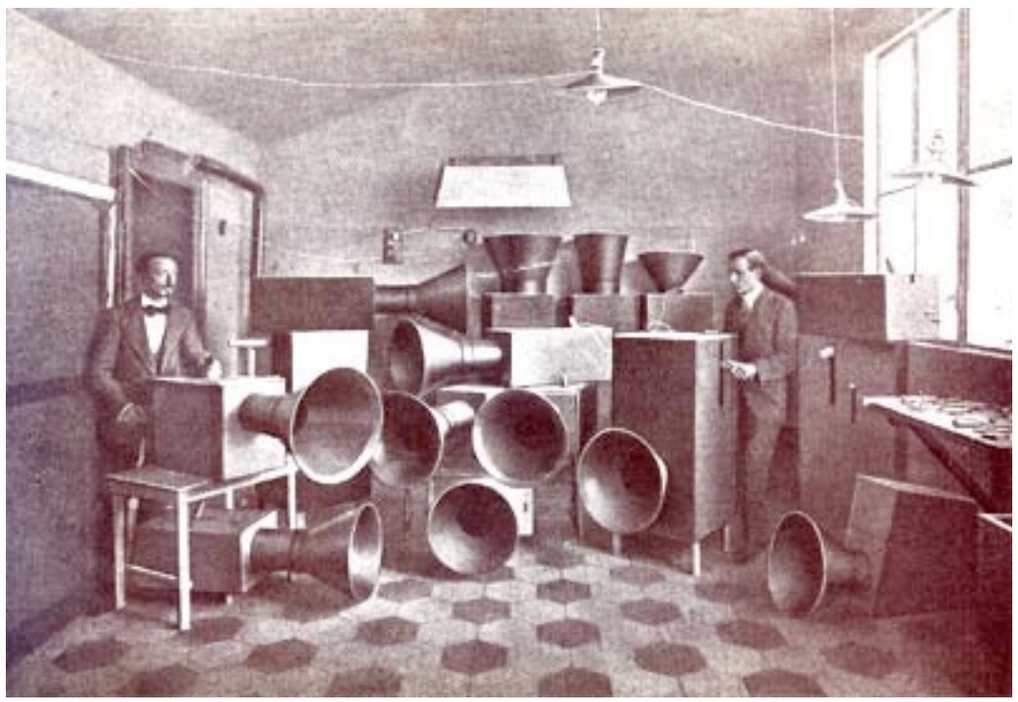
Player pianos (early 20th century)



Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Ideas of Change

Ferruccio Busoni “Manifesto” (1907)



Luigi Russolo and the Futuristas (1913)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

First Instruments

Leon Theremin (1920)

Ondes Martenot (1928)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Aleatoric and Concrete Music

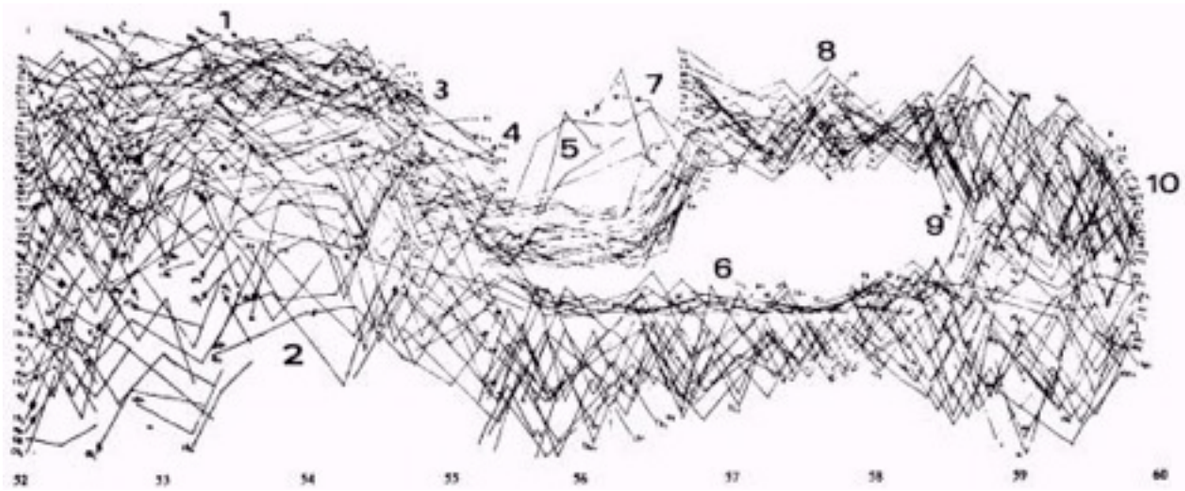
John Cage “Imaginary Landscape 1” (1939)

Pierre Schaeffer “Musique Concrète” (1949)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Stochastic Music, Multimedia

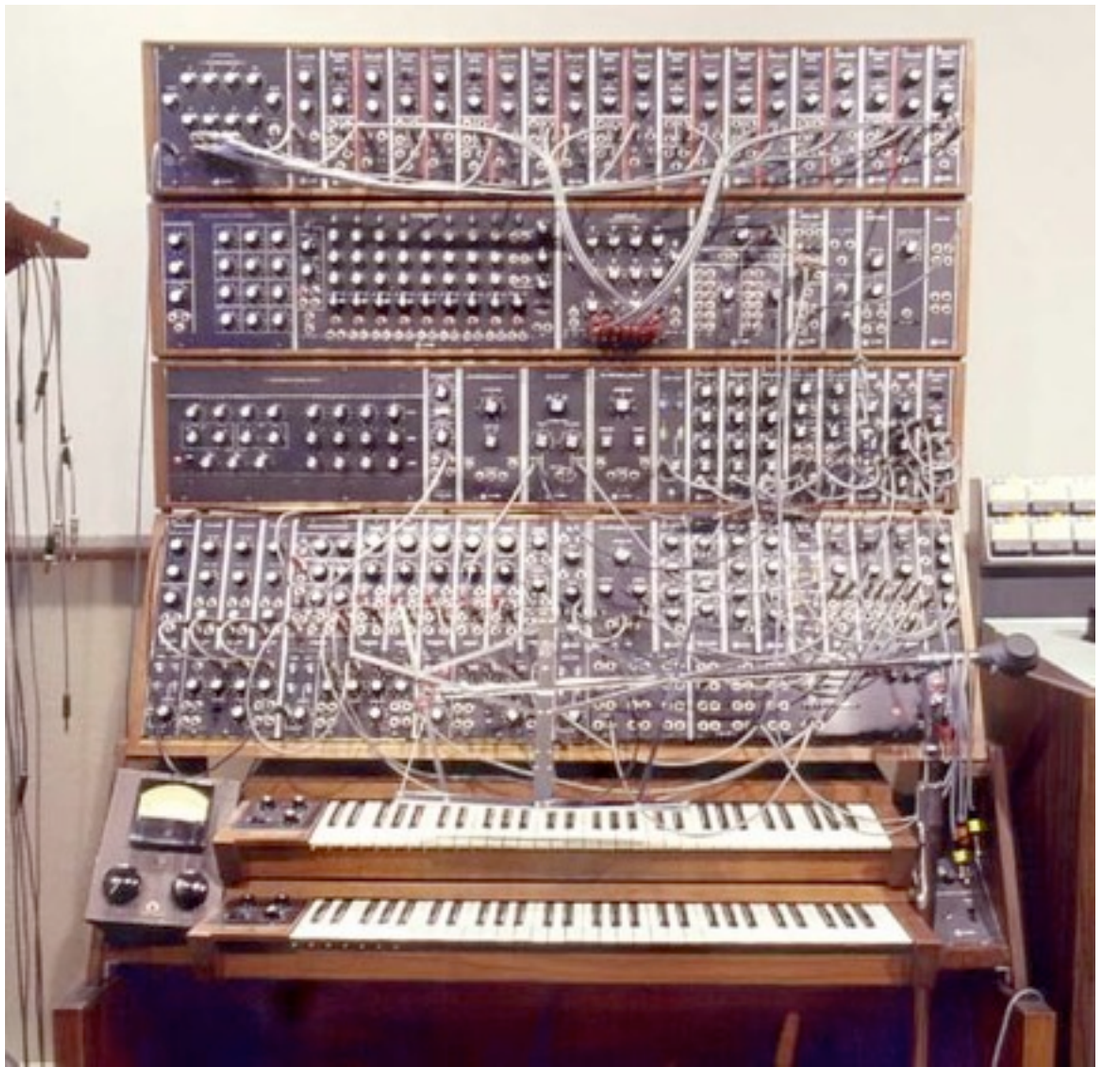
"Poeme Electronique" *425* speakers and video, Edgard Varese (1958)



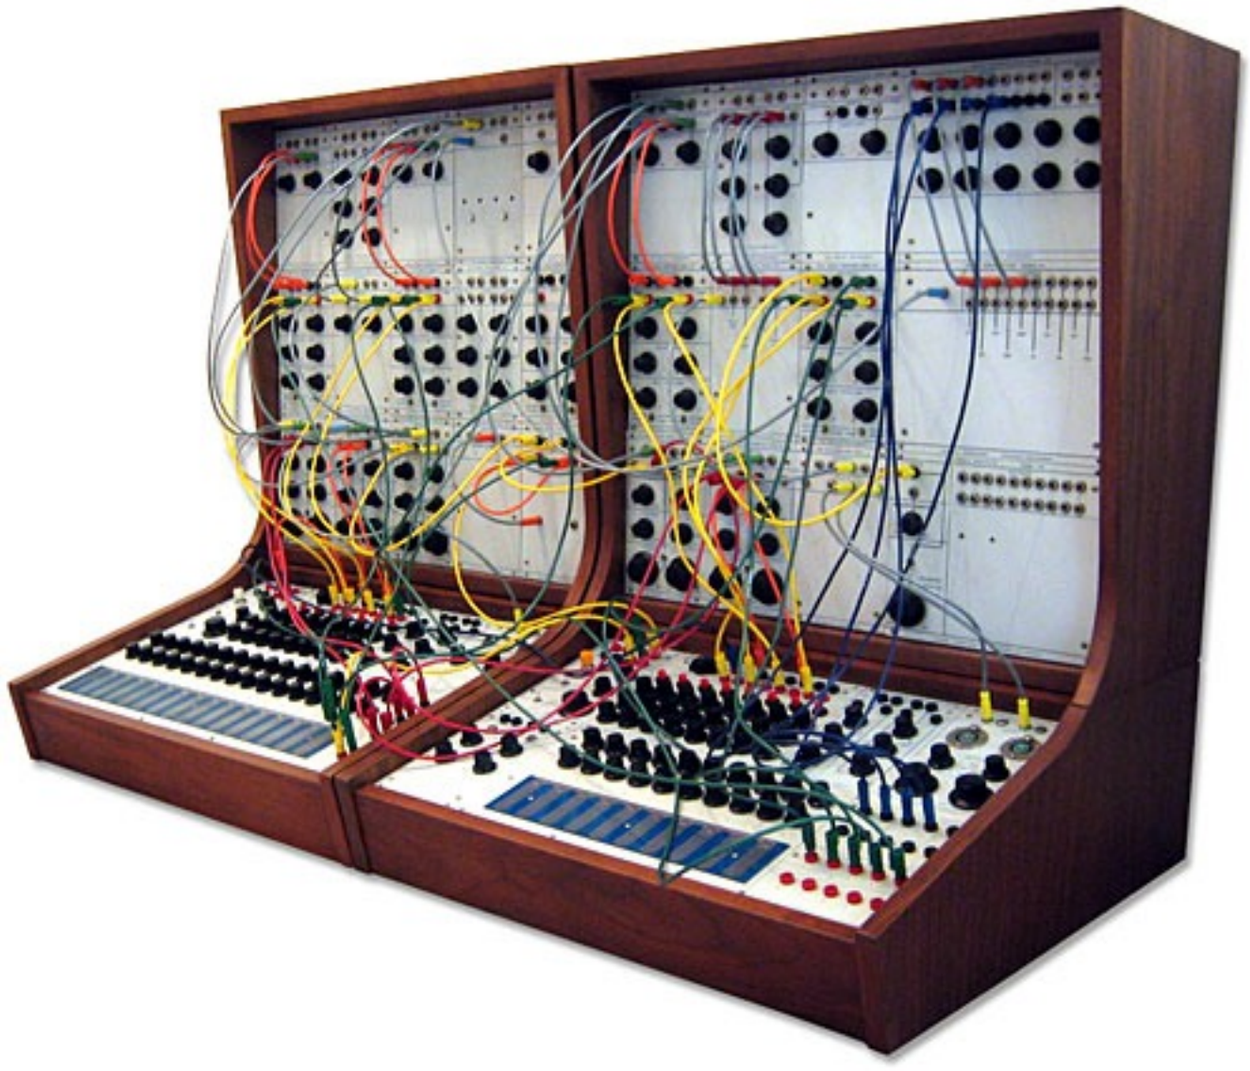
Measures 52-60, "Pithoprakta", Iannis Xenakis (1956)

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

1964: VCO Synthetizers



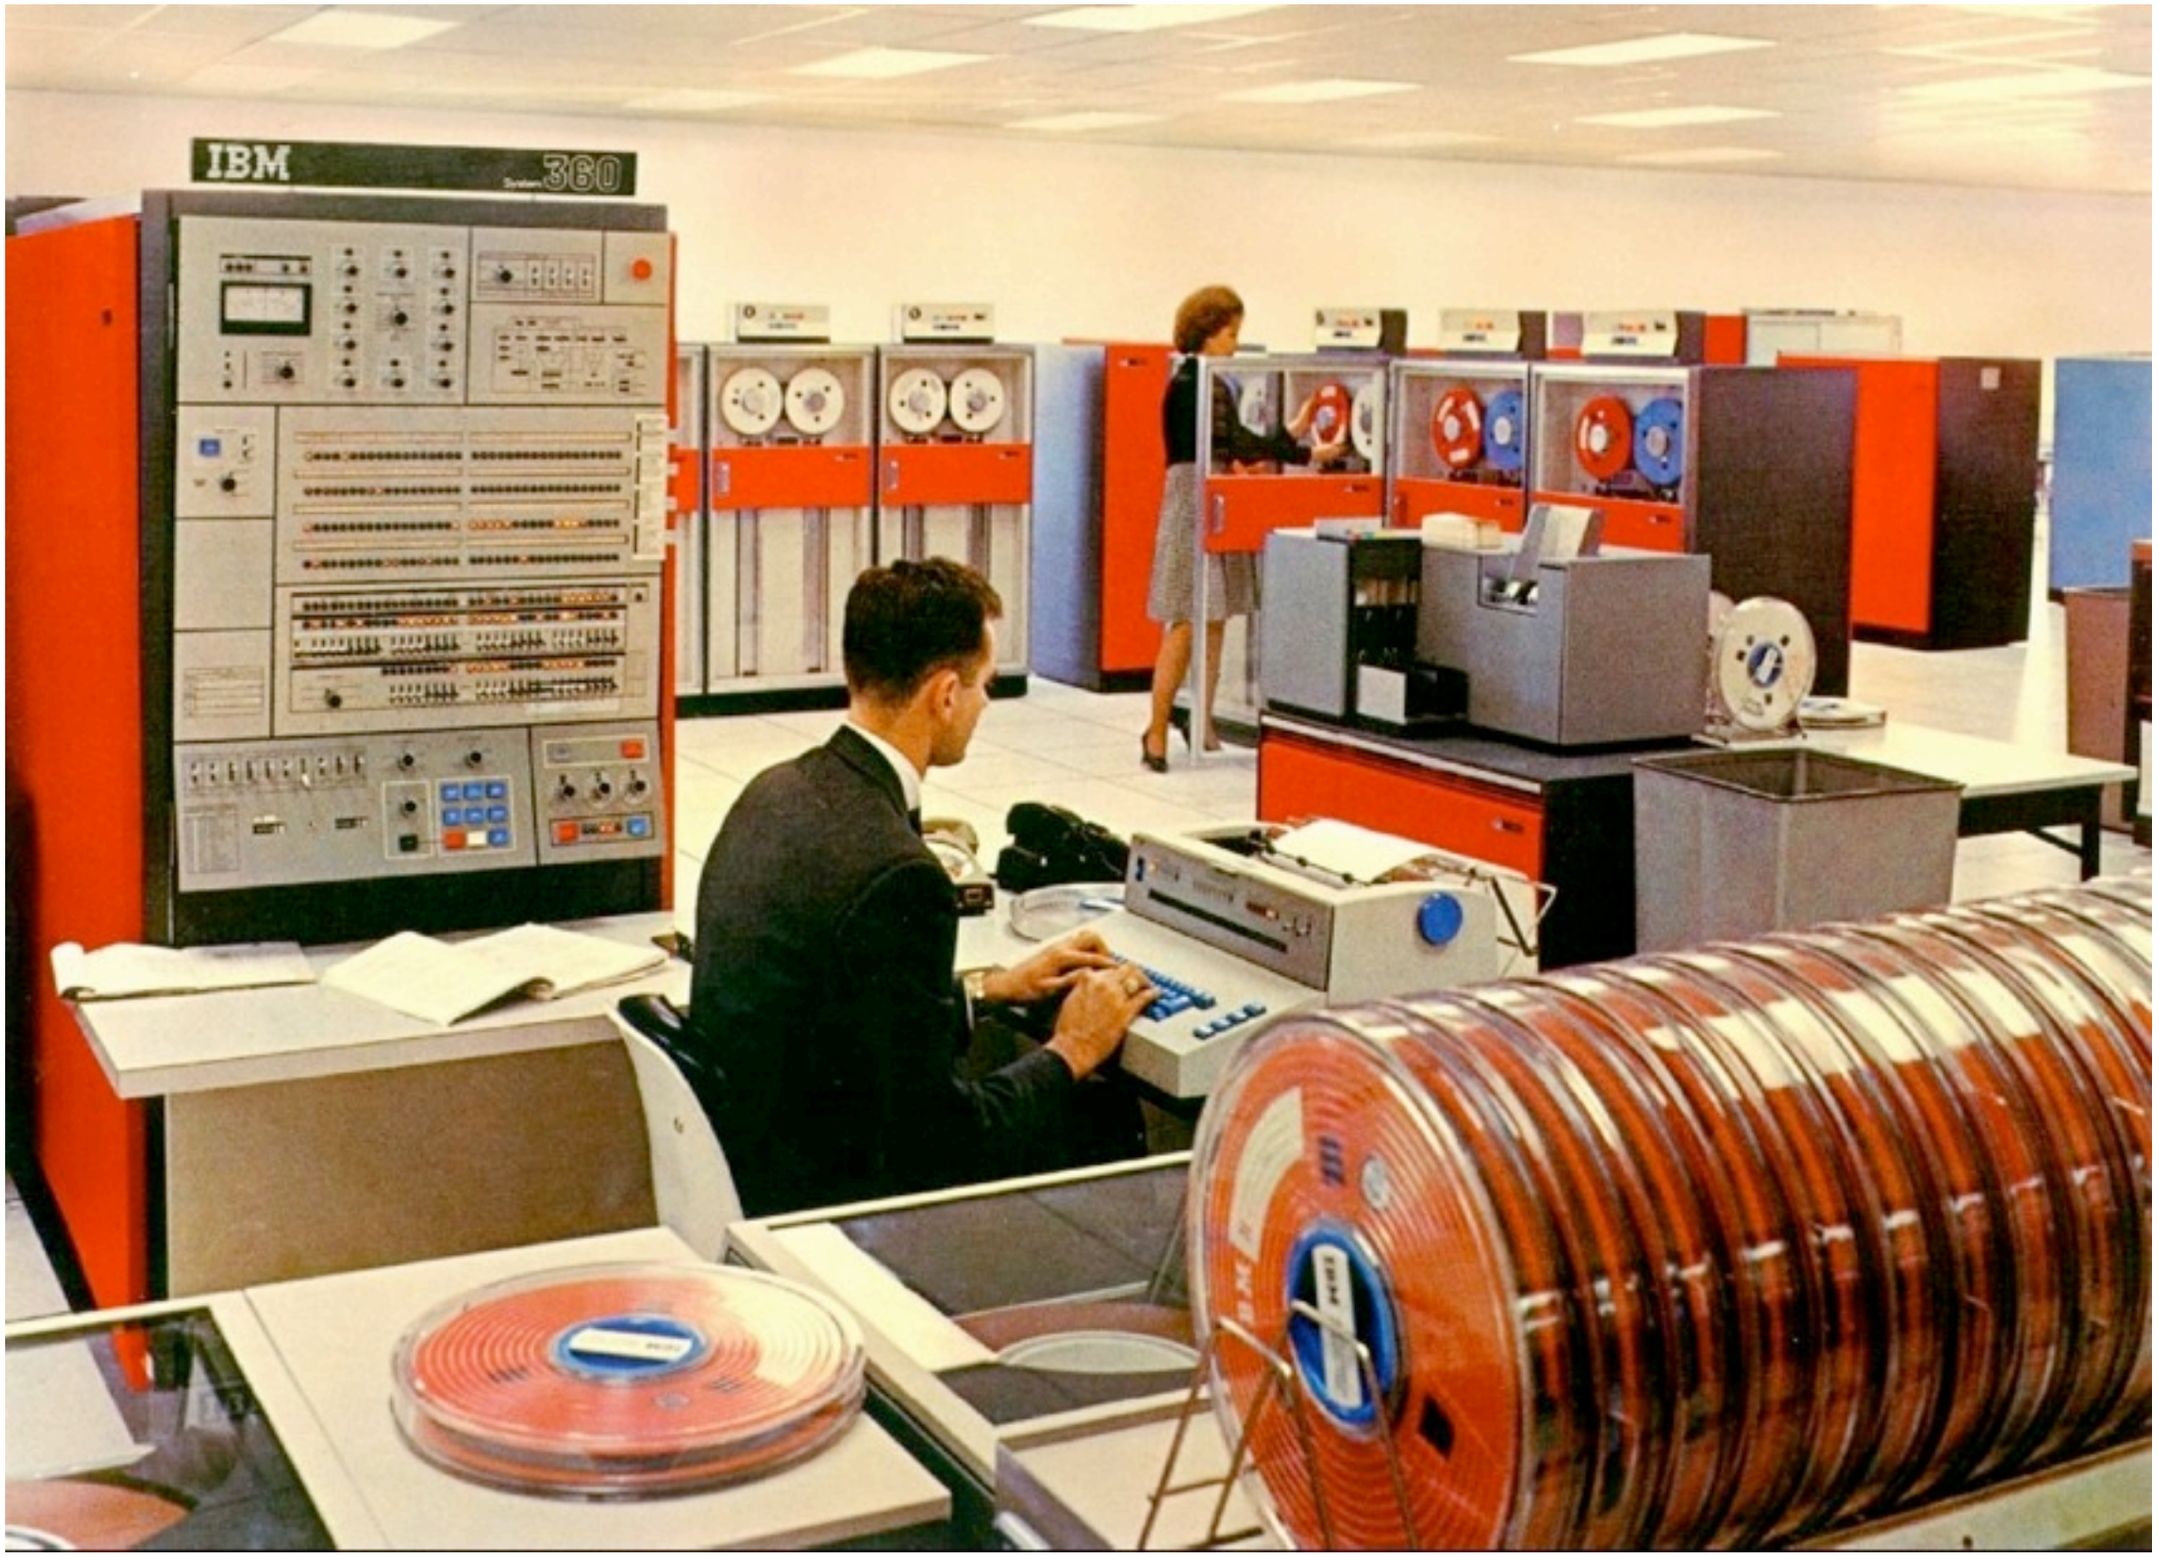
Robert Moog VCO Modular Synthesizer



Donald Buchla VCO Modular Synthesizer

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Computer Music Languages | Milestones



Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

MUSIC I - MUSIC N in Bell Labs

Max Mathews
The Father of Computer Music

1957: MUSIC I/MUSIC-N family:

Unit Generators (UGens) (atomic and predefined processing blocks)

UGens: Audio Input, Output, and Control Inputs

Examples: Oscillators, Filters, Amps, Envelope Generators

A Patch (instrument) is formed by connecting several UGens

An Orchestra is created through the connections of several Patches

A Score controls an Orchestra

Bicycle Built for Two" by Kelly, Lochbaum, and Matthews, 1961

MUSIC I - MUSIC N at Princeton and Stanford

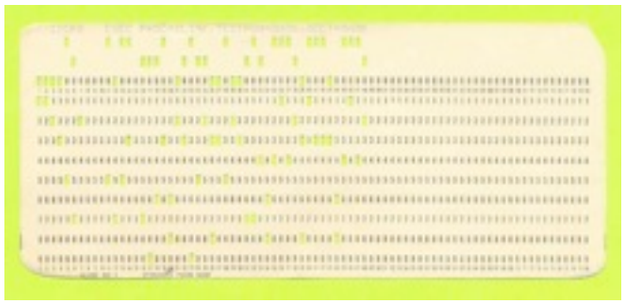
Max Mathews handles a copy of MUSIC IV to John Chowning

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

MUSIC 10 y SCORE, Stanford AI Lab

Chowning y Andrew Moorer create MUSIC 10 and SCORE

Design



Audio

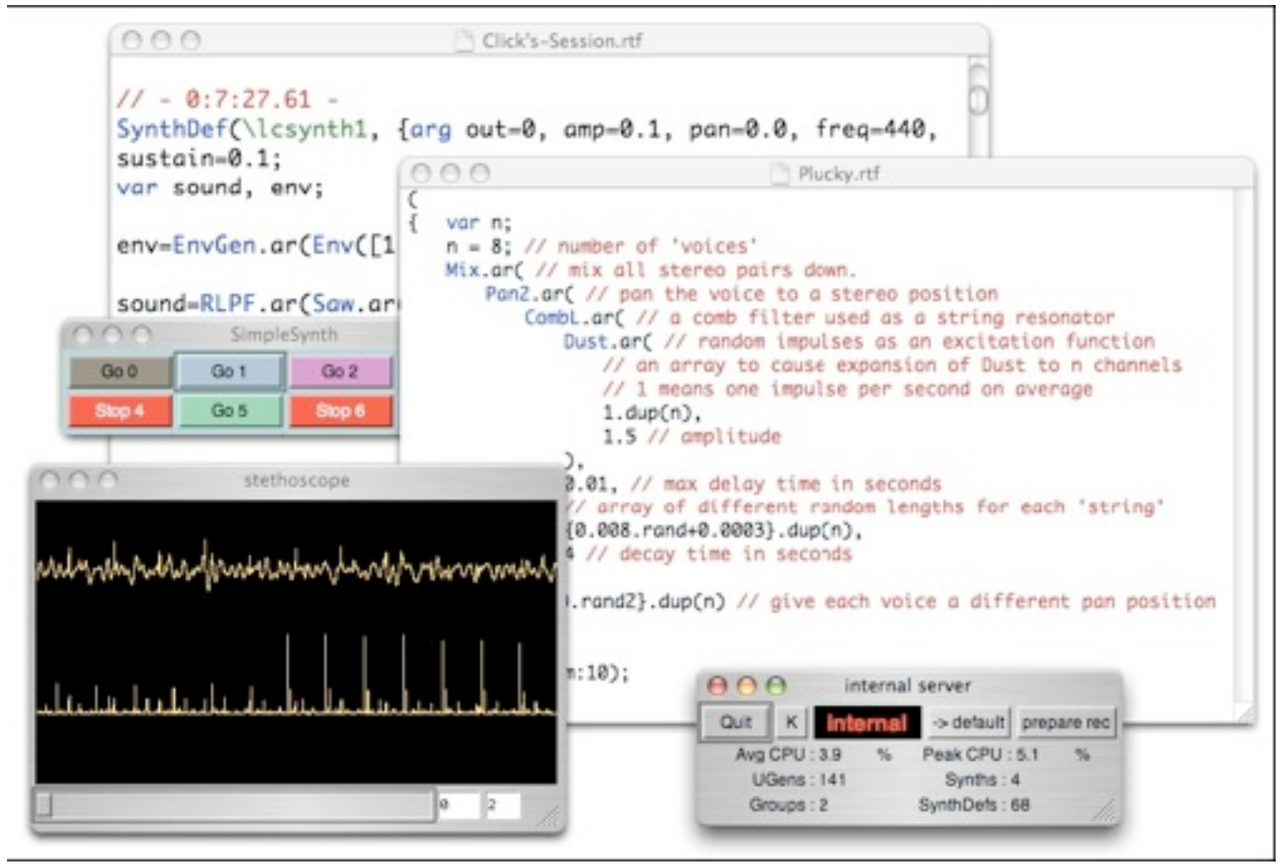
Very Slow Process

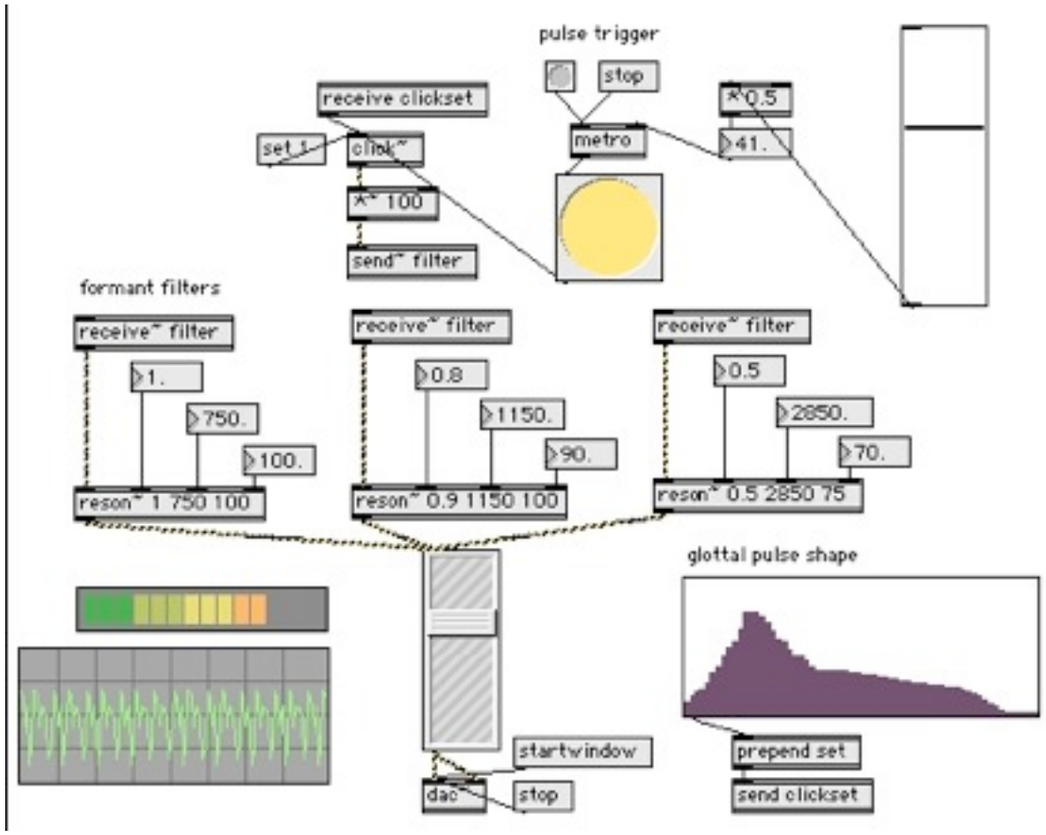
Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

1968: MUSIC V in FORTRAN

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Real-Time Systems





Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

...Network Music

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Network Music Performance

Def:

"A network music performance (nmp) is a ***bi-directional***, ***dis-located*** and ***multi-modal*** set of interactions regardless of its synchronicity or asynchrony between participants."

Alain Renaud

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Where does it come from?

1876

Elisha Gray: “Musical Telegraph”

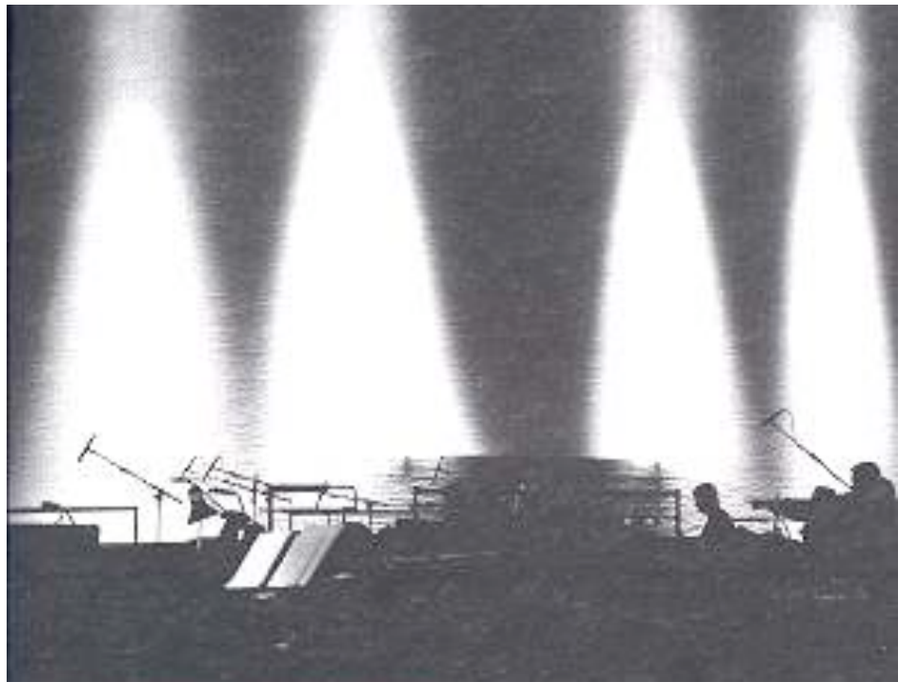
1929

Der Lindberghflug

Paul Hindemith / Kurt Weill / Bertolt Brecht

→ Radio Broadcast + Listener at Home

1950's



John Cage's "Transistor Radio"
Pieces

1966 - Public Supply - Neuhaus

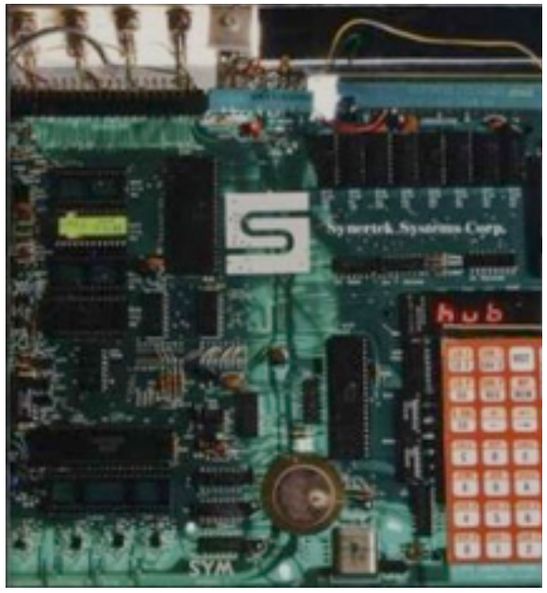
© Max Neuhaus

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Late 1970's

The Hub

A computer music network band



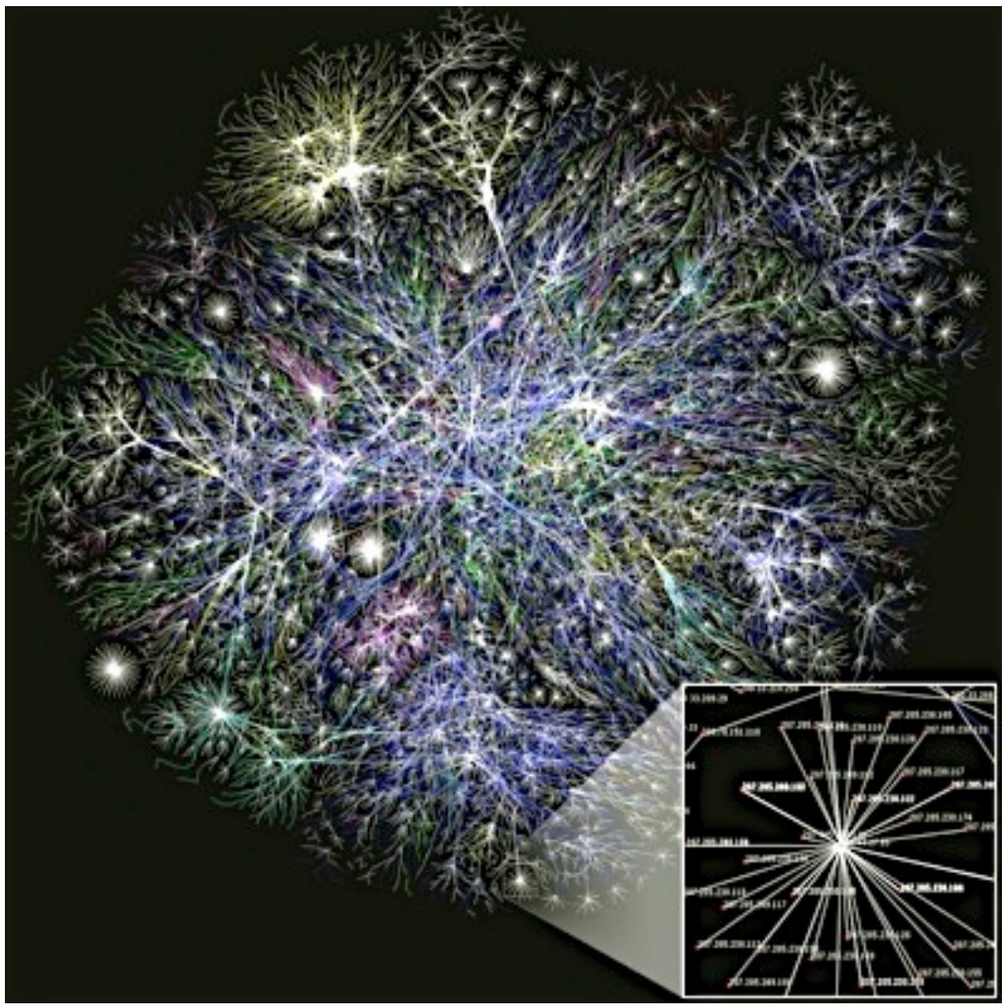
The League of Automatic Music Composers 1978- 1983

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

1988 - Françoise Legrand - Satellite Symphony: Beethoven and One Woman's Dream

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Digital Networks



1990's

Speedup of the Internet

Firsts bidirectional, "real-time" music exchanges

Real-time → 30 to 0.5 seconds

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Year 2000

CCRMA SOUNDWire
Sound Waves on the Internet from Real-time Echoes

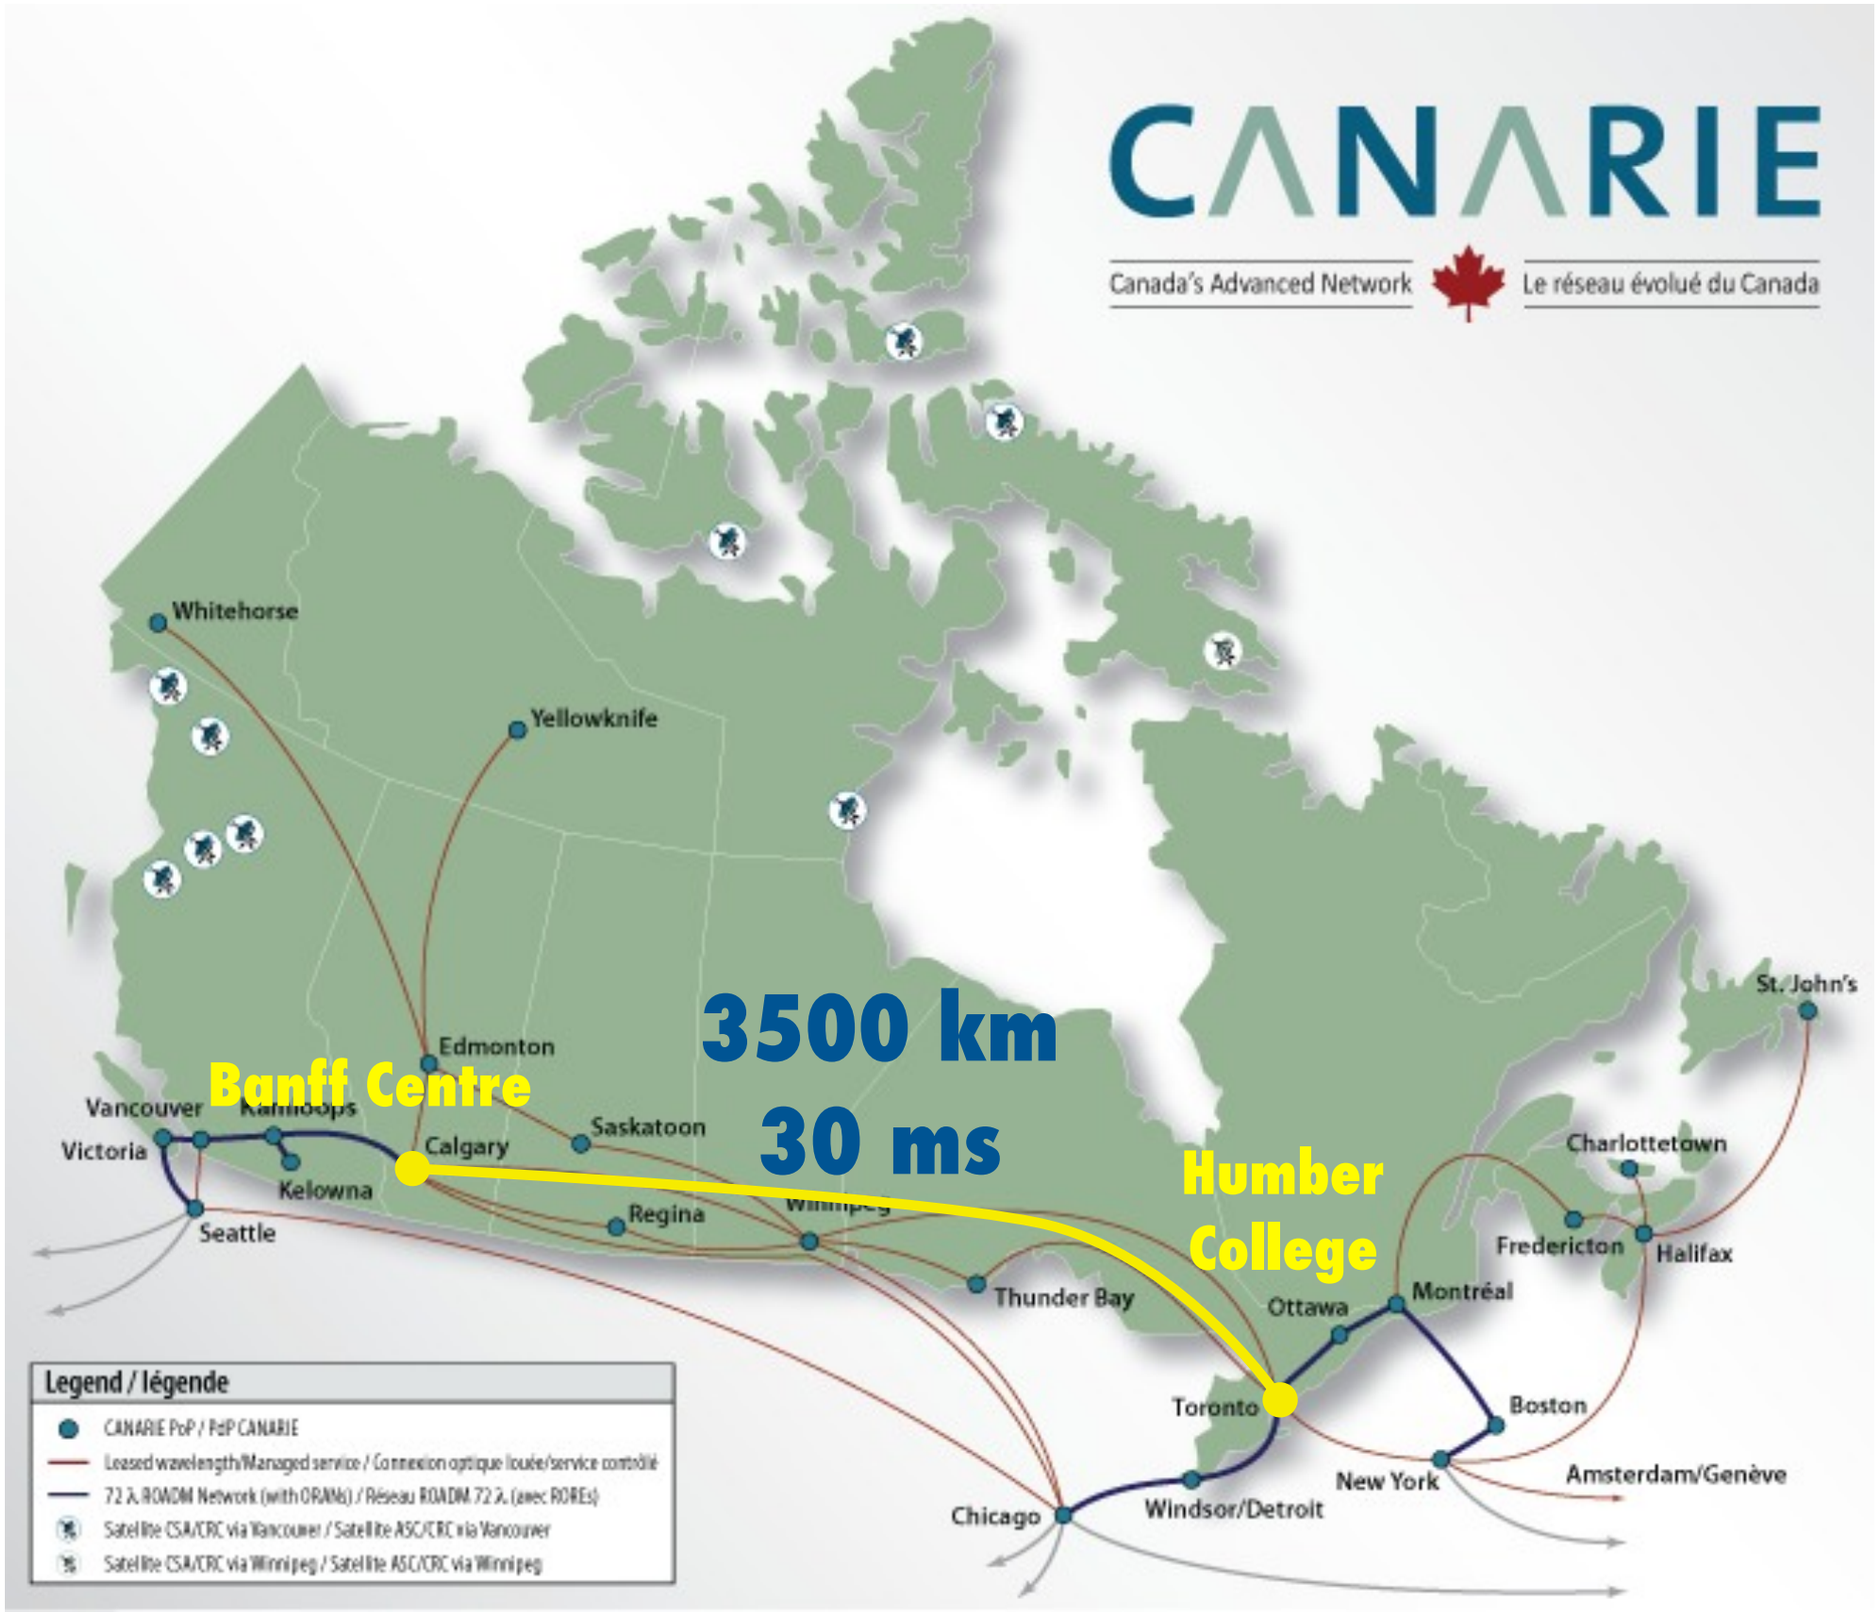
http://ccrma.stanford.edu/groups/soundwire/

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Some Examples

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

TeleJazz



Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

TeleJazz - 16 channels | 48kHz | 16 bits

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Banff

Toronto

Juan-Pablo Cáceres | CCRMA | Stanford University | jcaceres@ccrma.stanford.edu

Terry Riley's *In C* - Stanford/Beijing
April 2008

Juan-Pablo Cáceres, Chris Chafe | CCRMA | Stanford University | {jcaceres, cc}@ccrma.stanford.edu
